EDUCATION:

Codify Academy, 2016:

Front End Web Development.

Toin University of Yokohama, 2007

Law student.

EMPLOYMENT:

Codify Academy, 2016: Student

(Summary): I have made different kinds of pages mainly using Javascript, JQuery, API functions for my projects with attractive designs and styles using css3. Please click this link to check all of my projects, <http://developertopjor.com/#portfolio>, Or I have all of them pushed in my github account too.

PDS (People with Disabilities Succeeding), 2011-2016

(Summary): Currently I am working for People with Developmental disabilities and I facilitate them to achieve their dreams whether it's job coaching to earn their own pocket money or help them to live as much independently as they can in community. I have learned lots of things from them than from those who don't have disabilities as their heart is as pure as crystal water, and most importantly, they taught me 'Patience', which I think is very important to be 'Happy'.

SUSHI CHEF AT KURA ZUSHI, 2007-2010

(Summary): I was a Sushi Chef in one of the busiest restaurant in Tokyo while I was going to college. It really taught me a lot of things besides making sushi like, Teamwork, Leadership, Punctuality, and having a sense of Responsibility etc.

Plus, one of the main reasons I loved making sushi is the art and the presentation behind it which in some way is connected with being a developer as it helped in making my page attractive and stylish.
